

GOPHARMA AI

The Digital Infrastructure Layer for Healthcare

Connecting patients, providers, pharmacies and communities through one intelligent healthcare ecosystem.

- ✓ Reduce friction across healthcare pathways
- ✓ Improve access and patient engagement
- ✓ Support better outcomes at national scale

NHS-inspired

UK GDPR-ready

Built in the UK

**THE PROBLEM**

Healthcare is connected in theory. Fragmented in reality.

Patients, providers and services often operate across disconnected systems — creating delays, inefficiencies and avoidable pressure on frontline care.

01**Access Delays**

Patients struggle to access the right care quickly.

02**Disconnected Services**

Services operate in silos, making journeys feel fragmented.

03**Administrative Burden**

Providers spend valuable time managing processes instead of care.

04**Poor Navigation**

No trusted layer guides patients to the right next step.

Healthcare doesn't have a care problem. It has a connectivity problem.

OUR SOLUTION

One intelligent layer connecting healthcare.

GoPharma doesn't replace healthcare systems. It connects them — through a calm, trusted layer that improves access, coordination and engagement.

- ✓ AI-assisted healthcare navigation
- ✓ Service discovery across providers
- ✓ Appointment and referral support
- ✓ Prescription and pharmacy connectivity
- ✓ Community healthcare engagement
- ✓ Clinician-reviewed content and pathways

Digital super glue for healthcare stakeholders

MARKET

NHS workforce

Operational pressure

£200BN+

healthcare market

Large addressable space

8%

private growth

Growing demand

GoPharma is positioned as an enabling infrastructure layer across NHS, pharmacy, community and enterprise healthcare.

BUSINESS MODEL

Multiple scalable revenue streams

A platform model designed to scale across patients, providers, practices and enterprise partners.

01

Patient Memberships

Plus, Family and
Supporter plans

02

Provider Plans

Doctors, dentists
and pharmacies

03

Practice Plans

Clinics, GP
surgeries and
groups

04

Enterprise Partnerships

Employers,
insurers and
healthcare
organisations

05

Referral Revenue

Revenue-share
ecosystem
opportunities

Infrastructure businesses scale through network effects — more participants increase ecosystem value.

TRACTION

Building momentum towards pilot deployment

Current Progress

- ✓ Founder programme active
- ✓ Live platform development
- ✓ Clinical advisory support
- ✓ UK GDPR compliance pathway
- ✓ Partnership conversations underway
- ✓ Growing provider interest

Roadmap

- Q3 Pilot Deployment
- Q4 NHS Partnership Programme
- 2026 Regional Scale-Up
- 2027 National Expansion

Founder Programme Now Open

WHY PARTNER

Help build the future healthcare infrastructure

Founding partners help shape pathways, integrations and ecosystem value before national scale.

01

Co-Design

Shape pathways and patient experiences.

02

Early Integration

Connect systems and workflows early.

03

Shared Growth

Participate in future ecosystem value.

04

Strategic Influence

Help define platform priorities.

Founder Programme Open → Partner early. Shape the future of UK healthcare access.

Connecting healthcare. Reducing friction. Improving outcomes.

GoPharma AI is building the digital infrastructure layer that helps healthcare stakeholders work together more effectively.
